

<p>Learning Target: I can show mastery of working with GCF, LCM, and fractions by working through examples and showing my work.</p>	<p>Find GCF and LCM of: 72 and 12</p>	<p>Add: $92.34 + 1.36 =$</p>	<p>Subtract: $\begin{array}{r} 9\ 1 \\ -\ 18\ 6 \\ \hline \end{array}$</p>	<p>Multiply: $.25 \cdot 1.00$</p>	<p>Multiply: $3 \cdot \frac{\quad}{27} = \frac{9}{18}$</p>
<p>Learning Target: I can work through real world math problems through practice by completing a series of homework problems involving decimals.</p>	<p>Find GCF and LCM of: 12 and 60</p>	<p>Add: $\begin{array}{r} 7\ 1 \\ 1\ 9\ - \\ \hline 8\ 2 \end{array}$</p>	<p>Subtract: $\begin{array}{r} 1\ 1 \\ 1\ -\ - \\ \hline 2\ 4 \end{array}$</p>	<p>Multiply: $\begin{array}{r} 5\ 1 \\ 4\ - \cdot 3 \\ \hline 8\ 8 \end{array}$</p>	<p>Divide: $8 \div \frac{1}{10} = \frac{\quad}{4}$</p>
<p>Learning Target: I can solve real world math word problems by reading carefully and by applying the correct algorithm required for the problem.</p>	<p>My dog eats dog food that is \$24.48 for 12 pounds. What is the unit rate for my dogs food?</p>	<p>One package of 12 hot dogs at Sam's Club costs \$3.60. What is the unit cost of one hot dog?</p>	<p>Find the unit rate for one bag of peanuts if a case of 36 peanuts is \$72.00?</p>	<p>A tube of toothpaste at Walmart has 4.5 ounces of toothpaste and costs \$2.34. What is the cost per ounce of the toothpaste at Walmart?</p>	<p>Divide: $5.5 \div .175 =$</p>
<p>Learning Target: I can activate prior knowledge of math concepts by solving CAPS problems through the application of the appropriate algorithm.</p>	<p>A case of 24 cans of CocaCola costs \$5.99. What is the unit cost of 1 can of Coca Cola?</p>	<p>If we have a test which has 20 questions on it and the total point value of the test is 100 points, what is the point value per question?</p>	<p>One bag of Halloween candy bars costs \$8.98. If the bag has 132 pieces of candy inside, what is the unit cost per piece of chocolate?</p>	<p>Convert and Divide: $\begin{array}{r} 1\ 1 \\ 4\ - = - 2\ 3 \end{array}$</p>	<p>Divide: $121 \div 11 =$</p>
