

Name: _____

For each set of numbers, calculate the mean, median, mode and range.

Given the set { 3, 3, 4, 5, 6, 7, 7 } :

- What is the mean?
- What is the median?
- What is the mode?
- What is the range?

Given the set { 1, 3, 4, 5, 6, 7, 9 } :

- What is the mean?
- What is the median?
- What is the mode?
- What is the range?

Given the set { 3, 4, 5, 6, 7 } :

- What is the mean?
- What is the median?
- What is the mode?
- What is the range?

Given the set { 1, 2, 3, 3, 5, 5, 9 } :

- What is the mean?
- What is the median?
- What is the mode?
- What is the range?

Given the set { 3, 4, 6, 6, 7, 8, 8 } :

- What is the mean?
- What is the median?
- What is the mode?
- What is the range?

Mean: Average of the numbers in the data set. (Add all numbers together and divide total by the number of numbers in the data set)

Median: The number in the center of the data set (put numbers in order and choose the middle number)

Mode: The number that repeats most often in a data set (there may be more than one)

Range: Difference (how many units) between the lowest and the highest numbers in the data set
