

My Soil Profile Name: _____

Learning Target: I can demonstrate understanding of how weathering, erosion, and deposition along with human impact can change earth's surface by completing the soil profile activity and by taking the 3 question assessment on USATestprep. S6E5

1: Must represent of the 5 layers of earth's soil Points: 20

2: Must correctly label each of the five soil layers Points: 20

3: Must provide two facts about that specific layer Points: 30

4: Must be created using only items on hand, no buying supplies. (USE YOUR IMAGINATION) Points: 10

5: Must use this rubric to show explain your model: Points: 10

6: The standard is listed above, you must blend the standard (written out) into your artwork. Not as a label, but as a part of the description. In other words, write the standard somewhere within your model please. Points: 10

IMPORTANT:

You may turn this in between today and tomorrow at any time. If you need extra time no problem. We are all new to this virtual learning effort and I am happy to work with you as needed!

I will create a PowerPoint collection of your submissions for this project when I receive them all.

Make it fun, not a chore!

I will be creating my own and will submit to the blog later this afternoon.

My Explanation:
